

SHIVSHAKTI

TIMBER INDUSTRIES

CRAFTED WITH EXCELLENCE AND PERFECTION.

• INNOVATIVE • RELIABLE • SAFE

T his Far...

In 1983, when Shiv Shakti Timber Industries (SSTI) was setup, it was an extremely small initiative with an absolute resolve to make it big. The journey from 50 to 4000...yes, from a mere 50 pallets a day then, to 4000 pallets a day now, a radical transformation. This transformation is symbolic of the strong acceptance of the SSTI brand as the preferred supplier of branded wooden pallets, export packaging boxes and crates; products that are treated (heat treatment according to ISPM-15 norms) and certified (EURO, BS, US, ISO, GMA) to comply to the most stringent compliance standards, globally.

Business at SSTI, does come with a purpose as well. With the SSTI pallets, your goods are transported over pallets that have not harmed the environment. SSTI is, in fact, one of the first pallet manufacturing units to import and manufacture pallets from recycled wood.

Addressing the changing market needs and as any dynamic company would be expected to do, SSTI too has grown beyond just a pallet manufacturer to a complete logistics solutions provider with real-time automated palletisation solutions...so look no further!

Leading corporate across the globe, in pharmaceuticals, automobiles, heavy machineries, textiles, ceramics, chemicals, paper, FMCG, engineering etc. are testimony to this.

To sum up, with SSTI, it is a matter of confidence; confidence that the pallets are reliable, confidence that the pallets are green and confidence that the pallets are compliant to global regulatory requirements. All this to take care of something very valuable - your product! From confidence stems innovation.

SSTI, while having pioneered the concept of branded pallets in the country, is today a company that offers on-site, end-to-end automated turnkey solutions from palletisation to transport...with delivery that is punctual and support that is round-the-clock!

M anufacturing Ethos

The manufacturing ethos stems from the fact of providing reliable, safe and economical mode of packaging to customers. This ethos is not a destination, but an ongoing journey that drives every process in the SSTI manufacturing.

The state-of-the-art, fully automated pallet manufacturing and packaging facility is located at Jeedimetla, Hyderabad, well geared to handle production up to 4000 pallets per day and at the same time, conveniently scalable to the next level as well.

Equipped with the best-in-class machinery, comparable to the best globally, the manufacturing site is spread over an expansive 36,000 sq. ft. and manned by human capital that comes with sufficient experience and expertise to bring out quality products (thanks to one of the most elaborate online quality control measures) at the lowest price (due to the most sophisticated automation systems incorporated), resulting in a satisfied you!

The IPPC (International Plant Protection Convention), United Nations mandate requires that, to avoid migration of plant pests, all wood packaging materials which are heat treated as per ISPM-15 standards

Automated Line

by Department of PQC&S, Ministry of Agriculture, Government of India. As a part of our manufacturing process, all your pallets from SSTI are certified to ISPM-15 standards with the in-house heat treatment plant.

The versatile manufacturing process handles high-grade raw materials and offers pallets in a myriad of sizes, shapes and designs to suit your needs in accordance to international norms. To add, the SSTI pallets are built from sustainably harvested lumber and are constantly repaired, reused and recycled. No harmful chemicals are ever used on the SSTI pallets.

The quality systems have evolved over a period of time. Quality processes like personal inspection, self rejection and constant calibration, the Good Manufacturing Practices (GMP) and the adoption of the latest in technology go a long way in ensuring your product quality.

The success of SSTI is due to the fine blend of quality manufacturing coupled with technical proficiency, integrity and ability to understand and communicate with clients.

Corporate Office

P

allets – Adding Value to Your Products

Pallets play a pivotal role in the supply chain today. An inferior quality pallet or an erroneously chosen product could compromise your product. The identification of the right raw material continues to be a key differentiator for SSTI. Good quality wood, selected from different forests across the world, provide optimum protection for the palletised load. The company also evaluates the needs of the end-product, the shipping requirements in addition to regulatory requirements before suggesting an optimum solution.

With a spectrum of choices (size and loading capacities), there is a range of combinations to choose from, to suit every need. Fully comprehending the practical needs, the SSTI pallets are designed to be suitable for shrink and stretch wrapping. These pallets are created to provide an excellent base for boxes or trays as there are grooves provided in the blocks for an enhanced grip. The SSTI wood block pallets are strong and are easily stacked for unparalleled efficiency in transportation and safer to use in overhead racks in comparison to conventional pallets.

The tight control over pallet dimensions only helps in convenient use with today's fast packaging lines. The SSTI pallets are universal and can be used conveniently with any 'quality handling equipment'. These ISPM-15 heat-treated pallets come with global acceptance. Evidence of the global acceptance being that loads of SSTI pallets have been sent across the 6 continents (Antarctica being the exclusion).

EURO Pallets

A must for the European markets, these pallets come in two variants – Standard EURO and Modified EURO.

Standard EURO: These pallets are the most preferred pallets in the European Union. Compliant to EURO specifications, these pallets find use in the regulated markets of food and pharmaceuticals.

Modified EURO: These pallets are modified according to customer specifications and are primarily used by the electronics, electrical, automobile and allied industries.

Typical dimensions of EURO Pallets - 800 x 1200mm, 1000x1200mm, 800x600mm, 600 x 400mm

ISO Pallets

Manufactured in compliance with ISO Standards, these pallets are also called full perimeter base pallets (previously known as BS 2629 pallets). ISO pallets are offered in two variants – Standard ISO and Modified ISO.

Standard ISO: These pallets are compliant to ISO specifications and find use in the regulated markets of food and pharmaceuticals. Typical size of the pallet being 1000 x 1200mm.

Modified ISO: These pallets are modified according to customer specifications and are primarily used by the electronics, electrical, automobile and allied industries. Typical size of the pallet being 1000 x 1200mm.

Customised Pallets

With the challenges that logistics present, there continues to be a growing demand for customised pallets. SSTI specialises in these tailor-made solutions, to suit the specific needs of a customer. We could make any pallet size to suit a specific cargo requirement.

Storage Pallets

Warehouses continue to require quality pallets for their in-house storage. A number of companies use the SSTI pallets for storage. They are available in the standard racking dimensions.

GMA Pallets

These pallets are designed in accordance to the needs of the USA and Canadian markets. SSTI offers these in two variants – Standard GMA and Modified GMA.

Standard GMA: This is popularly known as 'Notch Pallet' or 'Stringer Pallet'. The only challenge being that these pallets are not suitable for handling equipment such as pallet trucks or forklifts available in India. Typical size of the pallet being 48" x 40".

Modified GMA: These pallets are exclusively developed to suit handling equipment like pallet trucks and forklifts available in India. Typical size of the pallet being 48" x 40".

SHIVSHAKTI TIMBER INDUSTRIES

Compliant to Global Standards

Compliance to standards is a sure indication of quality, the cornerstone of the SSTI business. This seemingly end-of-line product comes with significant ramifications on the efficiency and effectiveness of the supply chain.

With a growing global clamor for adherence to regulatory standards, SSTI plays its part in providing you pallets that are certified to comply to the most stringent compliance standards, globally – EURO, BS, US, ISO, GMA – as for everyone today, the world is the marketplace. Compliance to ISPM-15 only furthers this commitment. There is also the SSTI assurance that its products would stay abreast of changes in these standards and instill in you what it most desires, confidence!
